## INTERNSHIP

---

<b>Tekatron Pro Solution</b> I worked as a machine learning intern and made a Bank Marketing Campaign Analysis model using the ML library and modules.	03/2022 – 04/2022
---	-------------------

## PROJECTS

---

**Society Management System**  
*Used HTML, CSS, PHP and MySQL*

- It's a web application that manages society by houses and includes members information.
- It includes an admin panel, a user panel and a security panel.
- Each panel has its own functionality.

**Backtracking Algorithm Visualization**  
*Used python, pygame, tkinter*

- The Knight's Tour and Rat in the Maze visualize the Backtracking algorithm.
- The knight visits every location on the board exactly once during his visit.
- In Rat in the Maze, the rat begins at the origin and must get to the destination.

**Bat Shooter Game**  
*Used the Unity Engine and C#*

- 3D Shooting type game.
- A player has to shoot down bats in a given amount of time.
- A player can set a high score.

## SKILLS

---

• Python	• Java	• DBMS	• Data Structure
• Algorithm	• SQL	• HTML	

## ACHIEVEMENTS

---

**Hacktober Fest (01/2020 - 12/2020)**  
I successfully completed five pull requests and made an impactful contribution on GitHub.

**HackerRank Intermediate Problem Solving Certificate**  
July 09 2020

## INTERESTS

---

Game Development | Chess | Basketball | Cricket
